

TeleWell®

▶ TW-524

TW-524 WLAN AP 11n + PLA uses existing electrical network. A pair of these units can be used to form a working Local Area Network (LAN) without extra cabling.

In addition, device includes Wlan Access Point.

- With the Powerline feature a local network can be formed using existing electrical network
- 802.11n Wlan Access Point for forming a Wireless LAN
- WPS function

TW-524

FEATURES

- Works with any operating system
- IP TV support
- QoS, ToS, CoS
- 10/100 Mbps Ethernet port
- IPv4/IGMPv1-3
- 2 3dBi External Antennas
- Size: (HxDxW)
53 mm x 112,4 mm x 77,4 mm
- No separate PSU
- GTIN: 64 3001092 504 0
- Package contains: RJ45 Ethernet cable and User Guide

WIRELESS ACCESS POINT

- Supports 300 Mbps IEEE 802.11n/g/b standard (MIMO)
- Automatic channel selection
- Operating frequency: 2,4-2,484 GHz
- Security: WPA-PSK, WPA2-PSK, WEP 64/128
- WPS function
- WDS

POWERLINE ETHERNET ADAPTER

- Powerline standard: AV
- Data transfer rate: up to 200 Mbps
- Powerline frequency: 2-30 MHz
